SIDEWALL SEMI-TRAILERS

13m Sidewall Semi-Trailer

LNV-TRL-005

13m Sidewall Semi-Trailer is intended for bagged goods, palletized freight and general bulk cargo. A deck with side panels provides load containment while retaining access for general freight handling.

A CLOSER LOOK

APPLICATION & FIT

Bagged goods, palletized freight and general bulk cargo

Selection checks: Cargo type and bulk density; Internal body size and panel height; Panel opening and removal arrangement; Floor and load restraint details; Loading and unloading method.

What configuration does this listing describe?
The technical table reproduces the manufacturer-listed equipment for this model. Where alternative components or sizes are listed, the order specification must identify the selected option.

How should I assess the working load?
The manufacturer lists 40000KG. Match the actual load to the documented trailer rating, axle and tire limits, tractor capability and route requirements. A supplier capacity figure alone does not establish the permitted road payload.

What information is needed to select the right version?
Provide cargo type and bulk density, internal body size and panel height, panel opening and removal arrangement, together with the delivery ZIP code and the intended operating route. This allows the configuration and delivery plan to be checked against the job.

What is included with delivery?
The confirmed order identifies the trailer specification, supplied accessories and delivery scope. Delivery charges and eligibility follow the company shipping policy; do not assume an optional pump, compressor, hydraulic kit or other accessory is included unless specified.

What should I check for US use?
Verify the model-specific identification and certification documents, import eligibility and registration requirements before ordering for US road use. Published supplier specifications do not establish US approval.
